

**Verse 1**

When we met we were so jaded, left gated.  
Been through some shit. It's complicated. I hate it.  
Thinking that love was overrated, inflated  
But who were we fooling?

Cause...

There's a chemistry between us, curious?  
It just might be getting serious, beyond lust  
With just one touch, so oblivious, come on love  
Set these moves in motion

**Chorus**

Coming up from the worst  
Every sense is immersed  
Got me diving head first  
But there's no guarantee

Focused on every word said  
Got me placing you in bed  
Wheels are turning in my head  
The way you look at me  
Synced like a symphony

**Verse 2**

Organically start connecting, reflecting  
Take up a notch, we're intersecting, affecting  
Gotta know what you're expecting, protecting  
Guess I'll take my chances

'Cause

Undeniably we're aligned, intertwined  
I can feel us erase the line, give it time  
Magnetic forces of ours combine, redefine  
What we've set in motion

**Chorus**

Coming up from the worst  
Every sense is immersed  
Got me diving head first  
But there's no guarantee

Focused on every word said  
Got me placing you in bed  
Wheels are turning in my head  
The way you look at me  
Synced like a symphony

### **Bridge**

Every inch of your body is on my mind  
Wake me up with colors when grey shades blind  
You find the rhythm when my beat is skewed  
Hear it encapsulated with everything you do.

Every inch of your body is on my mind  
Wake me up with colors when grey shades blind  
You find the rhythm when my beat is skewed  
Become syncopated when I get close to you.

### **Chorus**

Coming up from the worst  
Every sense is immersed  
Got me diving head first  
But there's no guarantee

Focused on every word said  
Got me placing you in bed  
Wheels are turning in my head  
The way you look at me  
Synced like a symphony
