

Verse 1

The clouds roll in
It's just one of those nights
Can't see no stars baby
Just the moon in your eyes

Sure to disrupt
Sweeping in without warning
But you'll build me up
Cause when it rains, it starts pouring

Chorus

You're like the calm before the storm
Your flame breaks through the chill of unstable air
A moment destined to transform
Draw me in & knock me back with just one stare
I swear the lightning must follow as you move
Cause that thunder in my heart beats just to prove
You're like my calm before the storm

Verse 2

Words dissipate
Our lips communicate still
No magic at work here
Our body's blended at will

About to erupt
Sweeping in without warning
But you'll build me up
Cause when it rains, it starts pouring

Chorus

You're like the calm before the storm
Your flame breaks through the chill of unstable air
A moment destined to transform
Draw me in & knock me back with just one stare
I swear the lightning must follow as you move
Cause that thunder in my heart beats just to prove
You're like my calm before the storm

Bridge

Let nature play with the sky
I'm tuned into you and I

Nothing more natural than this
Sheet shifting when the storm hits
