

Verse 1

I'm just standing here not bothering nobody
You start trippin' out and going crazy hunny
Lately you've been acting strange, whatcha starting
If it's about me breaking up with you, well I'm sorry

You should just relax and don't think of me
Instead of yelling and then saying it's nothing
Don't really care how you feel, if you hate me
It's your problem you didn't take me seriously

Chorus

Why do you wanna fight?
About the past gone by
Wont you give up, stay cool?
I've got another guy
What's the matter with you?
You should move on too
Don't be getting all foolish - cause I don't love you

Verse 2

All those things I used to feel towards you
Have disappeared now and aren't coming back
Instead of acting like it hasn't ended
Get a life; grow up and face the facts

Because of all the ways you're acting stupid
I should have known better, blame it on cupid
Thought we could be friends, but boy you blew it
It's not your business who I want to get down with

Chorus

Why do you wanna fight?
About the past gone by
Wont you give up, stay cool?
I've got another guy
What's the matter with you?
You should move on too
Don't be getting all foolish - cause I don't love you

Rap

Beer goggles blind
With no sense of time
I rewind...the clock to try to knock
You back into my space
Those memories you erase
Like we didn't have the time of our lives
No second tries
Come on girl, you're my ride or die
Don't let our best moments fly by
